

Index

The following is an index of articles of professional interest to ocularists. These have appeared in *Today's Ocularist*, *The Journal of the American Society of Ocularists*, and the *Journal of Ophthalmic Prosthetics*. *Today's Ocularist* was published from the Winter of 1972 to the Fall of 1980. *The Journal of the American Society of Ocularists* was published from 1981 to 1995. *The Journal of Ophthalmic Prosthetics* began in 1996.

Articles are listed by one or more of the main topics they cover. It would be impossible to list them by every single topic within them. So, when researching a particular topic, look for related topics as well. For example, an article about prosthesis motility may contain some information about eviscerations, but not enough to include it under that heading.
